PROFESSIONAL SUMMARY

Senior Full-Stack Engineer & Technical Lead specializing in high-performance TypeScript ecosystems (Node.js & Vue.js). With a proven track record of architecting scalable SaaS platforms and integrating AI automation (Playwright, local LLMs), I am looking to bring my 0-to-1 system design experience and hands-on coding expertise to a forward-thinking, remote-friendly engineering team.

EXPERIENCE

Chief Software Engineer

SKYDREAMCITY TEAM

Apr 2025 - NOW

- Architected enterprise-grade AI-driven SaaS platforms and PWA applications for SMEs, leading the core technical strategy and end-to-end development as the primary technology partner.
- Spearheaded the development of a secure Retrieval-Augmented Generation (RAG) system and AI chat assistant, integrating LLMs to empower users to safely query and extract intelligent insights from private enterprise documents.
- Engineered autonomous AI web automation agents utilizing Playwright and LLM orchestration, building intelligent internal micro-systems to streamline and automate complex business operations.
- Established a high-performance full-stack architecture utilizing the TypeScript ecosystem, specifically Node.js (Fastify) for backend services and Vue.js (Nuxt 3 SSR) for frontends.
- Designed and implemented robust, self-healing code architectures using Fastify and Prisma, significantly reducing maintenance overhead and ensuring high system reliability.

CURRENT SALARY: BASED ON THE PROJECT

Head of IT / Hands-on Tech Lead (360 Team)

SWIVEL SOFTWARE

Jul 2022 - Apr 2025

- Acted as a "player-coach" leading a compact agile team of 5 engineers to develop "360", a flagship B2B Collaborative Portal for enterprise clients.
- Hands-on architected and coded core system components, successfully transitioning legacy logistics platforms into scalable TypeScript, Node.js, and Vue.js architectures.
- Mentored developers and established best practices, while managing deployment pipelines and system reliability for global operations.

CURRENT SALARY: HKD35,000 * 13 (EXCLUDE MPF)

Software Engineer
SWIVEL SOFTWARE

Mar 2018 - Jun 2022

- Developed and optimized core backend microservices and databases for high-traffic logistics management systems using TypeScript and Node.js.
- Collaborated closely with senior management on architectural decisions, gradually taking on leadership responsibilities to improve system performance, scalability, and data processing efficiency.

Programmer / Intern
YAKOO TECHNOLOGY LIMITED

Jun 2015 - Feb 2018

- Developed and maintained responsive web applications and customized CMS systems tailored for client needs.
- Gained foundational full-stack experience in PHP frameworks and frontend technologies.

ACADEMIC HISTORY

Master of Science in Software Technology
POLYU (MSC)

2016 - 2018

Focus on advanced software engineering and modern tech stacks.

BSc (Hons) in Applied Sciences
POLYU SPEED

2014 - 2016

Information Systems and Web Technologies.

Associate in Information Technology
HKCC (POLYU)

2012 - 2014

Foundational computing and IT systems.

Secondary Education
C.C.C. KEI CHI SECONDARY

2006 - 2012

Graduated successfully.

TECHNICAL ARSENAL

AI AND AUTOMATION

PLAYWRIGHT | OLLAMA | PROXMOX | AI AGENTS

CORE STACK

TYPESCRIPT | NUXT 3 | NODE.JS | VUE.JS | TAILWIND 4

DATABASE

PRISMA | MYSQL | MSSQL | POSTGRESQL | REDIS

INFRASTRUCTURE

DOCKER | LINUX CLUSTER | GITHUB ACTIONS

SALARY EXPECTATIONS

EXPECTED SALARY

Negotiable / Competitive

Open to global remote opportunities. Strong preference for hybrid/remote work arrangements.

AVAILABILITY

Available from May 2026
